

Unified Communications

Unified Communications and Collaboration for Desktop & Mobile

***STC Hosted
Voice UC gives
you the tools
needed to stay
connected to the
business from
anywhere, on
any device.***

OVERVIEW: STC Hosted Voice UC

With more and more businesses moving to remote workforces and “Bring-Your-Own-Device” (BYOD) environments, the need for more effective communication and collaboration is more important than ever. You need comprehensive tools that allow you stay connected to the business from anywhere, any time, and virtually any device.

STC Hosted Voice UC is a Unified Communications solution that combines calling, chat, meetings, voicemail, video, screen sharing and enterprise contacts into a single, easy-to-use interface to improve everyday communications and collaboration for businesses.

Never Miss an Important Business Call

Clients and colleagues can easily reach busy employees anytime through one business number that will automatically ring their STC Hosted Voice Corenexa App. Eliminating the necessity to track down employees on multiple numbers, STC Hosted Voice Corenexa App improves and streamlines communications, and seamlessly connects a distributed and fast-moving workforce. Gain the latest communication tools for your staff so they never miss a business opportunity.

Protect Your Business

Calls are directed right to an employee's smartphone without revealing any of their Personal information. This helps ensure that business calls continue to be routed to the right resource, regardless of where employees are. It also provides business continuity, so that calls go to someone in your company versus an individual that might have left to work for someone else (i.e. the dreaded competitor.) STC Hosted Voice Corenexa App also makes it easier to manage "bring your own device" (BYOD) work environments.

Stay Ahead of the Competition

STC Hosted Voice Corenexa App supports the virtual business office, enabling employees to

connect seamlessly anywhere they need to conduct business.

Leverage an Investment You've Already Made

You've already invested in an office phone system — so why not extend the same features and benefits to your mobile phone? Not only can your employees make and receive calls placed to their corporate phone number via their mobile device, they can leverage important communication features, such as:

- One click to join conference calls
- Extension dialing to coworkers
- Corporate and personal phone directories at an employer's fingertips
- Access to company international distance and dialing plan
- Management of what device rings when someone calls an employee's business number
- Listen to and manage voicemail
- View recent calls
- Manage virtual attendant settings

With businesses moving to remote workforces & "Bring-Your-Own-Device" (BYOD) environments, the need for more effective communication and collaboration is more important than ever.
